

THE AMERICAN JOURNAL OF HUMAN GENETICS

A quarterly record of research, review and bibliographic material relating to heredity in man.
Official Journal of THE AMERICAN SOCIETY OF HUMAN GENETICS

Editor: H. ELDON SUTTON

Department of Zoology, University of Texas, Austin, Texas 78712

The editor and his staff of associates will be glad to consider manuscripts pertaining to human genetics.

Subscription to THE AMERICAN JOURNAL OF HUMAN GENETICS or information pertaining to subscription should be addressed to Grune & Stratton, Inc., 381 Park Avenue South, New York 16, New York. The subscription price per volume is \$10.00. A volume consists of 4 numbers. Single numbers cost \$3.00. The first volume was published in 1949. One volume has been published each year since then.

Correspondence pertaining to membership in THE AMERICAN SOCIETY OF HUMAN GENETICS or to general society affairs should be addressed to the Secretary of the Society, Dr. S. H. Boyer, Department of Medicine, Johns Hopkins Hospital, Baltimore 5, Maryland.

mental and developmental studies of motivation, but that responses to the present general tests (are they the ones he means?), derive from so many sources, situational, peripheral and central, and there is so large a subjective element in interpreting them (an objection which has some justice in it), that one is forced to conclude that they should not be used for diagnosing the "total personality". Many critics would say that the Rorschach, T.A.T. and other similar tests are the only ones which can be used for this purpose.

Taken as a whole, the book reveals again Professor P. E. Vernon's extraordinary ability to summarize a mass of data and to extract or

abstract valuable judgements and generalizations from information stemming from many and varied sources. He is also a lucid and able exponent, and the book shows an admirable lack of prejudice in a very complex and difficult field. It will be of interest to a wide range of readers, as he intends, including psychologists and laymen interested in personality assessment and interviewing for occupational, counselling and clinical purposes. For students it will be an admirable introductory textbook, although not a guide to clinical techniques, and, like his other books, a useful source book for references, facts and interpretative judgements.

PERIODICALS

Aspects of the Demographic Situation in 17 Parishes in Shropshire 1711-60 by S. SOGNER.

An interesting study (by a Norwegian) of the development of a closed population over half a century, a period during which it is estimated to have doubled. Births (five per marriage) heavily exceeded deaths except during two short "disaster" periods.

Vasectomy Camps in Maharashtra by K. DANDEKAR.

The demographic and socio-economic composition of the men who underwent sterilization in forty-one vasectomy camps held in one district of the State. The average number of living children per man was about five (boys, three; girls, two).

Birth Intervals: Structure and Change by R. G. POTTER.

A study of the time components of the average

intervals between births where birth control is not practised. These components arise from gestation, post-partum amenorrhoea, anovulatory cycles, conception time and pregnancy wastage. The author shows that abortion has much greater impact when used as a supplement to contraception than when it is relied on alone.

Some Data on Intergenerational Occupational Mobility in Israel by J. MATRAS.

Less than one-half of bridegrooms, in marriages in Israel in 1955, reported themselves in the same (broad) occupational group as their fathers. The trends vary sharply with country of origin and length of time spent in Israel.

The Scientific Study of Mortality in Hungary before the Modern Statistical Era by R. A. HORVATH.

A history of the development of statistics in Hungary in the eighteenth and nineteenth centuries.

International Planned Parenthood News

The only international journal concerned solely with the world-wide problems of population and birth control.

- requested by libraries, universities, and sociological organizations;
- quoted by public speakers and newspaper correspondents.

Published ten times a year by the
INTERNATIONAL PLANNED PARENTHOOD FEDERATION

The IPPF, a federation of voluntary associations for family planning and governmental agencies in thirty-five countries, believes that

- family planning is a fundamental human right;
- a favourable balance between the populations and natural resources of the world is an indispensable condition of lasting world peace;
- that such a balance is unattainable unless knowledge of planned parenthood is extended.

THE EUGENICS SOCIETY

OBJECTS:—To study the influences that may modify inborn human qualities; to formulate and support policies for developing these qualities to the utmost advantage; to promote research on eugenic problems; and to foster a responsible attitude to parenthood.

Conditions of Election to Fellowship.—Election to the Society's Fellowship is restricted to persons who have made, or might be expected to make, some contribution to eugenics or to the activities of the Society.

Fellows are elected by the Council, but no candidate shall be elected a Fellow unless he has been proposed and recommended by a Fellow.

Applications for Membership should be addressed to the Secretary, Eugenics Society, 69 Eccleston Square, London, S.W.1. Members receive the EUGENICS REVIEW free, are entitled to attend lectures, discussions and general meetings, and have the use of the library. Annual Subscription £2 2s. 0d. per annum.

Those who are not members can subscribe for the EUGENICS REVIEW. Communications regarding subscriptions to the EUGENICS REVIEW should be addressed to the Secretary.

Editorial communications and Books and Periodicals for review should be addressed to the Editor.
